

# GP PRO

GP Pro is a high carbon, high fibre pellet product that can sink into the bottom of the pond to act as a water treatment agent to reduce ammonia/nitrite/nitrate level and stabilize the pH in the pond and also as feed for bottom feeders like shrimp. Minerals complex, vitamin D and WinPro are added into GP Pro. Vitamin D promotes the absorption of the minerals in shrimps during low temperatures and the rainy season. The additive of WinPro allows the benefits of WinPro to be introduced into aquaculture. GP Pro can promote gut microbiota and prevent pathogen infections, such as early mortality syndrome (EMS). Hence, improve shrimps survival rate and growth performance.

## Functions

1. Promotes success rate of aquaculture.
2. Overcomes common diseases, such as early mortality syndrome (EMS).
3. Boosts immune system.
4. Reduces production cost through feeding efficiency.
5. Improves growth performance.

## Composition

1. WinPro
2. Mineral complex
3. Vitamin D
4. Organic matter

## Recommended dosage

Shrimp	0-60 days	The inclusion rate is 1:1
	≥ 60 days	The inclusion rate is 1:3
Fish	0-60 days	The inclusion rate is 1:2
	≥ 60 days	The inclusion rate is 1:5-10

## Storage

Store in a cool and dry place. Reseal the liner when not in use.

Win Men

PMT 1213, Jalan Perindustrian Bukit Minyak 8,  
Taman Perindustrian Bukit Minyak,  
14100 Simpang Ampat, Penang, Malaysia.
