

WM is the probiotic for the environment where it improves the environment microbiota, thus improves the environment condition. Apply on soil, WM will ferment organic matter within the soil and other microorganisms in the soil will feed on the fermented matter. Metabolites produced by the WM will help to activate other beneficial microorganisms. When desirable microorganism increase in number, other living things in the soil such as worms, will increase along with them. Apply in aquatic systems, WM decomposes sludge, improves water quality and recovers the ecosystem. The bacteria in WM and the enzymes and organic acids they produce can effectively remove odour, keeping barns free of foul smells. WM also can be used to ferment raw materials for animal feed.

Functions

1. For water treatment, composting organic waste and used as fertilizers.
2. Eliminates harmful bacteria in the GI tract and environment.
3. Enhances the performance of livestock and aquatic species.
4. Improves water quality.
5. Quickly decomposes uneaten fish food and other toxic material.
6. Enriches soil aggregation.
7. Promotes healthier environment microbiota.
8. Removes odour.
9. Acts as a fermentation agent.

Composition

1. Win Men's probiotic cocktail
2. Specialized bacteria activated solution

Recommended dosage

Shrimp

Fish

The initial inclusion rate is 1:200 in water or feed.

Storage

Store in a cool and dry place. Reseal the liner when not in use.
