

WINPRO

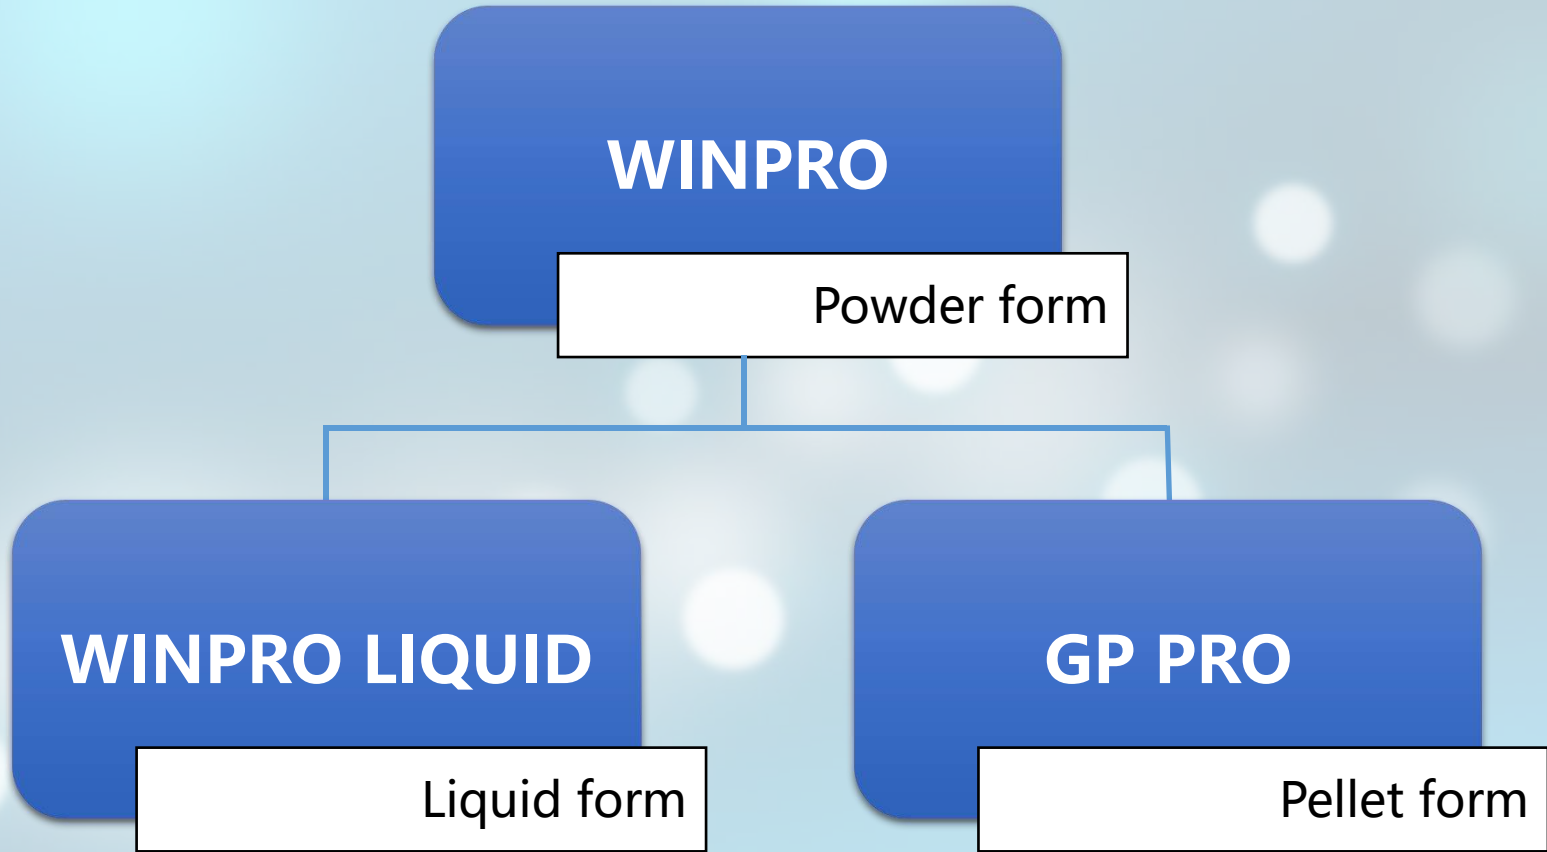

Powder form

WINPRO LIQUID

Liquid form

GP PRO

Pellet form

WINPRO LIQUID - introduction

- WINPRO LIQUID is the liquid form of WINPRO. (WINPRO LIQUID是液体状的WINPRO。)
- WINPRO LIQUID can directly use in the pond water or mix with feed, let the feed absorb the WINPRO LIQUID before feed to the animal. (WINPRO LIQUID可以直接用在池塘的水中或与饲料混合，让饲料吸收WINPRO LIQUID后再喂食给动物。)

WINPRO LIQUID - components

- Functional components:
 - WINPRO

WINPRO LIQUID - features

- Prevents viral and bacterial infection. (防止病毒和病菌感染。)
- Enhances immunity and disease resistance. (增强免疫力和抗病能力。)
- Produces multiple types of digestive enzymes in large amount. (大量生产多种消化酶。)
- Degrades mycotoxin from feed. (降解饲料中的霉菌毒素。)
- Improves feed digestibility and growth performances. (改善饲料的消化率和生长表现。)

WINPRO LIQUID - recommended usage

- The inclusion rate is 1:50 in feed
- The inclusion rate is 1:200 in water

WINPRO LIQUID

```
graph TD; A[WINPRO LIQUID] --> B[All in One]; B --> C[WM]; B --> D[AQUACLEAN]; C --> E[Probiotics]; D --> F[Water treatment]
```

All in One

WM

Probiotics

AQUACLEAN

Water treatment

WM - introduction

- WM is the probiotics for the gut and the environment, where it can improve the gut condition and environment condition. (WM是肠道和环境的益生菌，可改善肠道状况和环境状况。)
- WM can effectively remove odor. (WM可以有效去除异味。)
- WM also can be used to ferment raw materials for feed. (WM还可以用于发酵饲料的原料。)

WM - components

- Functional components:
 - WIN MEN'S PROBIOTICS COCKTAIL

WM - features

- Eliminates harmful bacteria in the gut and environment. (消除肠道和环境中的有害细菌)
- Enhances the performance of the animals. (提高动物的表现。)
- Speed up the decomposition of uneaten fish food and other toxic material. (加速未食用的饲料和其他有毒物质的分解。)
- Promotes healthier gut and environment microbiota. (促进更健康的肠道和环境菌群。)
- Removes odors. (去除异味。)
- Acts as fermentation agent. (充当发酵剂。)

WM - recommended usage

- The inclusion rate is 1:50 in feed
- The inclusion rate is 1:200 in water

AQUACLEAN - introduction

- AQUACLEAN is a 100% chemicals free water treatment product with the aid of high concentration of specially selected bacteria. (AQUACLEAN是100%无化学物的水处理剂，拥有高浓度的精选益菌。)
- AQUACLEAN breaks down biological wastes and harmful substances in water and removes odor. (AQUACLEAN可以分解水中的生物学废物和有害物质，并去除异味。)
- AQUACLEAN can remove and prevent algae growth by out compete the algae for nutrients. (AQUACLEAN可以通过与藻类竞争获取营养来去除和防止藻类生长。)

AQUACLEAN - components

- Functional components:
 - WIN MEN'S PROBIOTICS COCKTAIL

AQUACLEAN - features

- Improves water quality and clarity. (改善水质和水的清晰度。)
- Reduces filter maintenance. (减少过滤器的维护。)
- Helps establish new aqua systems. (帮助建立新的养殖水系统。)
- Keeps water clean and reduce odor. (保持水质清洁并减少异味。)
- Removes ammonia/nitrite/nitrate. (去除氨/亚硝酸盐/硝酸盐。)
- Removes and prevent algae growth. (去除并防止藻类生长。)
- Quickly decompose uneaten fish food and other toxic materials. (快速分解未食用的饲料和其他有毒物质。)

AQUACLEAN - recommended usage

- Add 1 L of AQUACLEAN to 200 L of water.

GP PRO - introduction

- GP PRO = Win Men's pellet + WINPRO
- GP PRO contains vitamin D to promote the minerals absorption in shrimps during low temperature and rainy season. (GP PRO 含有维生素D，可在低温和雨季促进虾的矿物质吸收。)

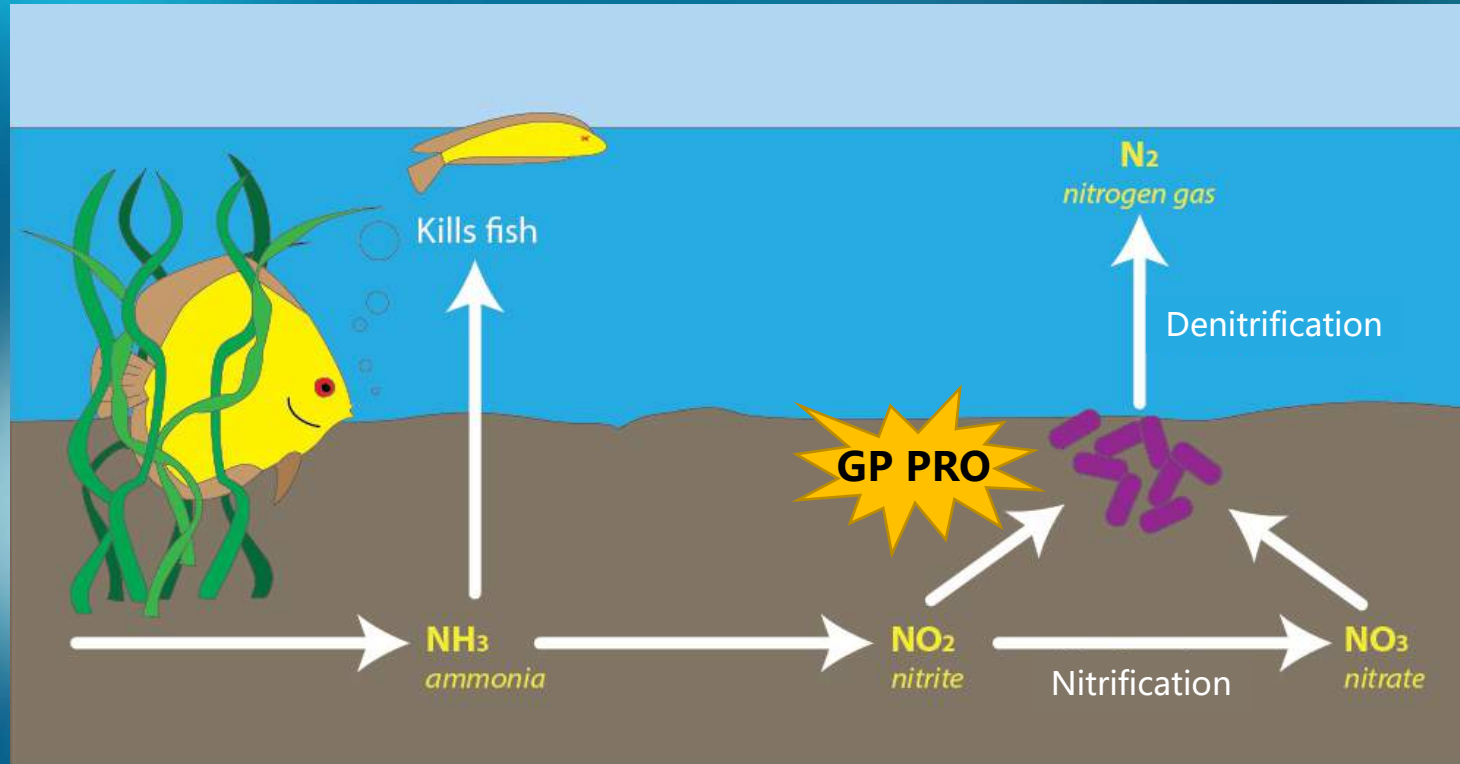

WIN MEN'S PELLET (云门的颗粒)

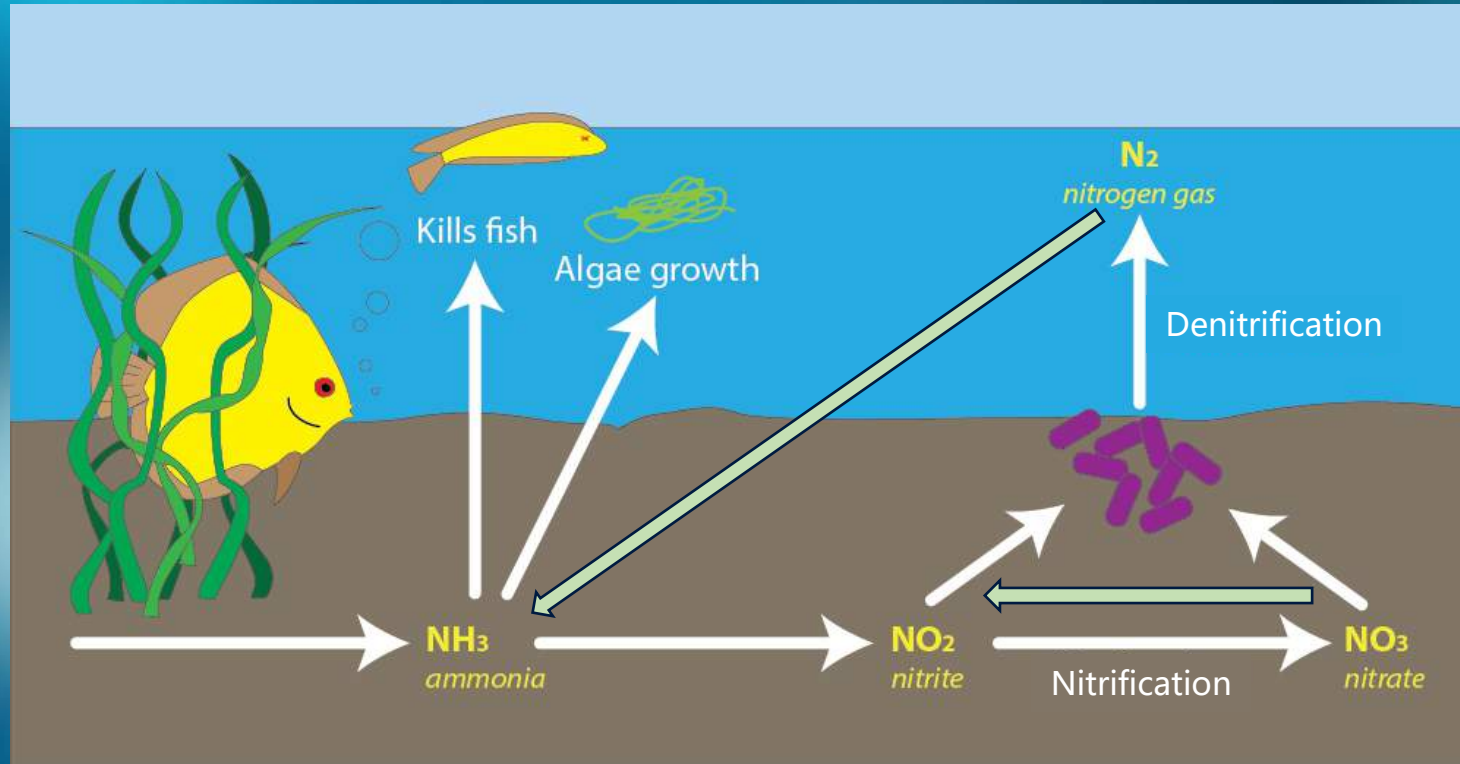

- Low protein, high organic carbon sinking pellet (高有机碳下沉颗粒)
- As vehicle to carry additives into water/bottom of the pond (作为媒介将添加剂带入水/池塘底部)
- As feed for bottom feeder like shrimp (作为底部喂食动物，如虾，的饲料)
- As water treatment agent to reduce ammonia/nitrite/nitrate level and stabilize the pH in the pond (作为水的处理剂，以降低氨/亚硝酸盐/硝酸盐含量并稳定池塘中的pH)

Nitrogen Cycle in Water (水中的氮循环)

Nitrogen Cycle in Water (水中的氮循环)

GP PRO - components

- Functional components:
 - HIGH ORGANIC CARBON MATTER
 - MINERALS COMPLEX
 - VITAMIN D
 - WINPRO

GP PRO - features

- Promotes success rate of aquaculture. (提高水产养殖的成功率。)
- Overcomes common disease, such as early mortality syndrome (EMS) and white feces syndrome. (克服常见疾病，例如EMS和白屎综合征。)
- Boosts immune system. (增强免疫系统。)
- Reduces production cost through feeding efficiency. (通过饲料效率降低生产成本。)
- Improves growth performance. (改善生长表现。)

GP PRO - recommended usage

Animal	Day	GP PRO : Feed
Fish	0 -60th	1:2
	≥ 60th	1:5, 1:10
Shrimp	0 -60th	1:1
	≥ 60th	1:3
EMS/White feces treatment	1st - 3rd	1:0
	4th - 6th	3:1
	6th - 8th	1:1
	> 9th	1:3
