

PREGNACARE

PREGNACARE is formulated with various Chinese herbal extracts with miscarriage prevention effect as the primary function and antibacterial and anti-inflammatory effects as the secondary functions. Successful pregnancy is attributed to a self/non-self model of immune recognition in sows during pregnancy. PREGNACARE can prevent miscarriage by maintaining maternal immune receptivity to the fetuses during pregnancy while protecting the sow from disease infection. With the addition of vitamins, minerals and essential amino acids, PREGNACARE improves delivery rates and piglet uniformity.

Functions

1. Soothes the fetus and prevents miscarriage.
2. Improves delivery rates and piglet uniformity.
3. Strengthened with vitamins to boost the fetal immune system.
4. Strengthened with minerals to meet fetal growth needs.
5. Enhanced with amino acids to increase birth weight.

Composition

1. Combination of various herbal extracts
2. Essential amino acids
3. Vitamin and mineral complex
